

List of Extra Core Projects (on-going)

As of November 11, 2021

	Country	Project	Donor	Start	Completion (scheduled)	Outline
1	Ethiopia	Amhara and Tigray Market Oriented Agricultural Products Improvement Project	Alliance for a Green Revolution in Africa	August 2018	February 2022	Enhancing agricultural productivity and market access to improve the income and food security of some 350,000 small-scale farmers and their families. Consortium project with Farm Radio International (FRI) and TechnoServe Inc (TNS). Video training (water/irrigation management, composting, nutrition, etc.) were produced in collaboration with FRI/TNS and provided to extension agents and farmers.
2		Alliance for a Green Revolution in Africa	Rocky Mountain Institute	May 2021	May 2022	Through data collection and analysis, we will obtain evidence on the economic viability of switching from diesel-powered to electric-powered flour mills, which are predominantly used in rural Ethiopia. Ultimately, the results will be incorporated into the RMI's National Productive Use Program to realize a solar-powered mini-grid for electricity supply in rural Ethiopia.
3	Mali	Integrated Seed Sector Development Project in the Sahel Region	Embassy of the Netherlands in Mali	November 2020	October 2024	Targeting 180,000 farmer households in Mali and Niger, the project aims to develop a quality seed market, establish stable seed production, and promote collaboration between producer groups and the private seed sector.
4	Nigeria	Kano State Agro-Pastoral Development Project	Islamic Development Bank (loan to Kano State Government)	August 2020	August 2025	Loan to Kano State Government to disseminate improved agricultural technologies through exhibition plots and other activities to 450,000 small-scale farmers. The project will train 220 state agricultural extension agents, 1,000 village extension agents, 18,000 farmer facilitators, 440 agro-processors, and 220 agricultural machinery manufacturers, as well as train 450,000 small-scale farmers in the state in rice, maize, sorghum, and millet cultivation techniques. The project will provide technical package of inputs (seeds, fertilizers, pesticides), soil and water management technology, agricultural mechanization and cultivation technology to 450,000 small-scale farmers in the state. The project will also provide training in post-harvest handling, farm machinery operation, business development, financial management, monitoring and evaluation, and establish joint collection and shipping centers in 22 administrative districts of the state.
5		Cooperation Project with Bayer in Vegetable Production	Bayer AG	April 2021	March 2023	The project aims to improve productivity and livelihoods by distributing hybrid vegetable seeds to 4,750 farmers in Kaduna State and 4,000 farmers in Kano State and training them in the latest agricultural technologies.
6		Strengthening the Resilience of Women and Girls Affected by Conflict, Violent Extremism and Climate Change in the Lake Chad region	United Nations Women (UN Women)	October 2021	February 2022	Training in horticultural crop production and agro-processing techniques (e.g. parboiled rice) will be provided to 350 women in two districts of Yobe State (Damaturu and Bade). In view of the security situation in Yobe State, ADP staff from Yobe State will be invited to conduct the training in neighboring states such as Gombe and Jigawa. The targeted women will be trained by the trained ADP staff in a cascading manner.
7	Uganda	Karamoja Regional Agriculture and Market Support Program	United Nations World Food Programme (WFP)	August 2020	December 2023	Promote market-oriented agriculture among 12,000 small-scale farmers to enhance food security and increase incomes.
8		Northern Uganda Development Initiative	The European Union	March 2020	July 2023	By 2023, we will eradicate poverty in northern Uganda and intensify the production of nutritious, marketable and diversified crop and animal-based foods and products with the aim of improving livelihoods and inclusive socio-economic development.
9		Market Oriented Agriculture Promotion (SHEP) Project in Adjumani District, Northern Uganda	International Food Policy Research Institute (IFPRI)	April 2021	March 2022	Training of about 2,000 farmers in three districts (Adjumani, Lawmo and Kitgum) in northern Uganda on the market-oriented agricultural promotion (SHEP) approach.
